Don Bosco Matriculation School
93 %

ACADEMIC PROJECTS

Hospital Management System

- Built a website using java as backend and HTML, CSS for the frontend and MYSQL as database.
- It implements all the activities of the hospital in a computerized automated way to fasten the performance.
- This includes doctors, staffs, patients and specialists including salary, appointments and billing information.

E-License Generator

- I have created a web-based application using HTML and CSS for the frontend. For the backend, MySQL, java, servlet.
- The user has to sign in first. Once signed in, they can log in using their email ID and password. After logging in, users can update their details, view their license, and permanently delete their records from the database.

- COMMUNICATION SKILL

- FLEXIBILITY

- DISCIPLINE

LANGUAGE

English

Tamil

Portfolio

- I have created my portfolio webpage using html, CSS and java script
- It contains 5 section home, about, skills, project and contact each section contains the particular contact.
- In the contact section, you can enter your details along with a specific message. After pressing the "Send" button, all the content will be sent to me via email. I have implemented the SMTP concept to ensure the delivery of the message.

CERTIFICATES

Completed the Java Full Stack developer course at Qspiders.
